

# Comp320 Research Artifact

Alastair Rayner

January 6, 2018

# Research Questions

## **My Research questions I aim to answer**

- ▶ How does game tree search techniques compare for GVGAI?

# Research Questions

## **My Research questions I aim to answer**

- ▶ How does game tree search techniques compare for GVGAI?
- ▶ Where does each tree search technique do well in each game?

## **My Research questions I aim to answer**

- ▶ How does game tree search techniques compare for GVGAI?
- ▶ Where does each tree search technique do well in each game?
- ▶ What are the strengths and weaknesses of different search techniques and how can they be improved?

## **My Research questions I aim to answer**

- ▶ How does game tree search techniques compare for GVGAI?
- ▶ Where does each tree search technique do well in each game?
- ▶ What are the strengths and weaknesses of different search techniques and how can they be improved?
- ▶ Can visualizing the actions an agent will take in the competition lead to

## **My Research questions I aim to answer**

- ▶ How does game tree search techniques compare for GVGAI?
- ▶ Where does each tree search technique do well in each game?

- ▶ Can visualizing the actions an agent will take in the competition lead to

# The Goal of this Research Artifact

## The Goal

# The Goal of this Research Artifact

## The Goal

- ▶ To create a hyper heuristic agent that has been modified from the strengths and weaknesses found in different tree search techniques.

# The Goal of this Research Artifact

## The Goal

- ▶ To create a hyper heuristic agent that has been modified from the strengths and weaknesses found in different tree search techniques.
- ▶ The current aim is to visualize the search space of an algorithm and look for the strengths in particular games and scenarios.

# The Goal of this Research Artifact

## The Goal

- ▶ To create a hyper heuristic agent that has been modified from the strengths and weaknesses found in different tree search techniques.
- ▶ The current aim is to visualize the search space of an algorithm and look for the strengths in particular games and scenarios.

## Visualizations for the GVG-AI Competition

## Visualizations for the GVG-AI Competition

- ▶ One of my main focuses this far is to get visualizations rendering over the competition.

## Visualizations for the GVG-AI Competition

- ▶ One of my main focuses this far is to get visualizations rendering over the competition.
- ▶ Being able to visualize where the agent is planning to go and finds most interesting/valuable to explore can help to creating an hyper heuristic that will search the right places(REWORD).
